- FRIDAY SEPTEMBER 12TH	48 - 82

WELCOME MESSAGE

“ We are excited to invite you to AFRIC “The Annual Fertility and Reproduction International Conference” Powered by Farah Fertility Centre. Our conference will take place on September 11th-12th, 2025 at Cairo, Egypt. Our goal is to create a groundbreaking event where leading experts, researchers, and practitioners can come together to share insights, exchange knowledge, and revolutionize the field of fertility.

Our platform serves as a space for experts, researchers, and practitioners from all backgrounds to come together and share their insights and knowledge about the male and female aspects of fertility. Through dynamic discussions and interactive sessions, we strive to promote a deeper understanding of the complexities and interdependencies involved in reproductive health.

We are committed to creating an inclusive and collaborative environment that empowers individuals and cultivates a holistic approach to reproductive medicine. Join us on this transformative journey as we delve into the intricacies of male and female fertility.

ABOUT AFRIC

VISION

At AFRIC, our vision is to lead the way in advancing assisted reproductive technologies and infertility treatment, with the ultimate goal of bringing joy, hope, and fulfillment to couples who are longing for parenthood. We believe that every individual should have access to high-quality, evidence-based reproductive care, and we envision a future where infertility is treatable, if not entirely preventable.

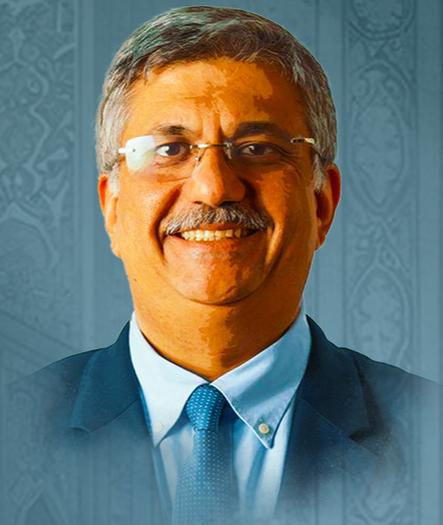

MISSION

Our mission is to create a world where infertility is no longer a barrier to parenthood, and where individuals and couples can receive the support and care they need to achieve their dreams of starting a family. We're committed to staying at the forefront of the latest developments in reproductive medicine, and to using our platform to promote awareness and education about infertility and its treatment.

Join us as we work towards a future where every individual has the opportunity to experience the joy of parenthood, and where infertility is no longer a source of pain and frustration.

Miscarriage Medical Management

“WHO guideline 2022”

CLINICAL SERVICES Recommendation 27: Medical management of induced abortion at gestational ages < 12 weeks

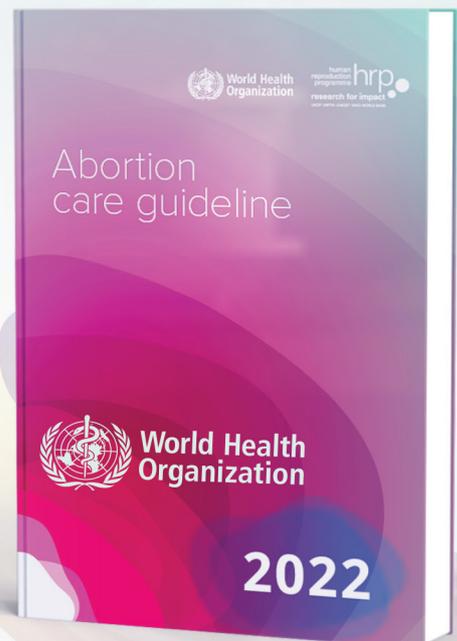

For medical abortion at < 12 weeks:

- Recommend** the use of 200 mg mifepristone administered orally, followed 1–2 days later by 800 µg misoprostol
- When using misoprostol alone: **Recommend** the use of 800 µg misoprostol administered buccally, sublingually or vaginally.*
- (NEW) Suggest** the use of a combination regimen of letrozole plus misoprostol (**letrozole 10 mg orally each day for 3 days followed by misoprostol 800 µg sublingually on the fourth day**) as a safe and effective option.**

Remarks:

- Evidence from clinical studies demonstrates that the combination regimen (Recommendation 27a) is more effective than misoprostol alone.
- The suggested combination regimen of letrozole plus misoprostol may be **safe and effective up to 14 weeks of gestation**.

* Repeat doses of misoprostol can be considered when needed to achieve success of the abortion process. In this guideline we do not provide a maximum number of doses of misoprostol.

let it
GO GENTLY

	LETROZOLE	MISOPROSTOL
INDUCED ABORTION < 12 WEEKS ^d	10mg PO daily for 3 days	800µg SL on day 4
